Portfolio: <https://lukisky.github.io/Portfolio/>

Career Summary

- AI/ML Expertise: Proficient in Artificial Intelligence, Machine Learning, Deep Learning, and Computer Vision, with practical experience in AI for image detection and optical character recognition.
- Programming & Frameworks: Strong command of Python (7 years experience), complemented by TensorFlow (3 years experience), for developing and implementing AI models and applications.
- Full-Stack Development: Experienced in full-stack programming, including back-end (Java, PHP, C#, Kotlin, SQL, MySQL) and front-end (HTML, CSS, JavaScript, Unity) development.
- Data & Analytics: Solid foundation in data mining and analytics, with an interest in working with data to drive system development.
- UI Design: Skilled in designing user interfaces and user experiences using Figma, focusing on creative, intuitive, and user-friendly designs.

Experience

UI Designer, Web and App Developer Freelancer Self-Employed

May 2025 - Present

- Designed and developed a responsive, custom web application from scratch using ReactJS 19.2, incorporating reusable components, state management (React Hooks/Context API), and API integrations for dynamic content rendering.
- Delivering end-to-end projects from UI/UX design to front-end development, ensuring user-centric and visually polished results, led to a 50% boost in customer views.
- Collaborated with 5+ businesses including Hilton Parkes, PLCE, Shalom Indonesia, etc, with positive feedback.

App Developer PT APIKKO, Indonesia

January 2024 - January 2025

- Engineered comprehensive full-stack solutions, including robust back-end systems, intuitive front-end interfaces, and seamless API integrations, improving application performance and boosting user satisfaction by 40%.
- Developed advanced AI solutions for image detection and OCR, automating administrative input validation, increasing data accuracy by 90%, and preventing potential data corruption.
- Launched a user-centric E-commerce platform, creating a new direct sales channel, expanded market reach by 60% and increased revenue opportunities.
- Built a secure and highly efficient transaction application, enabling reliable money transfers and strengthening financial operational integrity, resulting in a 50% reduction in transaction errors.

Web Developer Intern PT APIKKO, Indonesia

September 2022 - November 2022

- Optimised website backend architecture, streamlining customer transactions and reducing processing time by 35%, enhancing overall user satisfaction.
- Revamped website design and user interface, building intuitive layouts and visually engaging graphics, boosting user engagement by 50% and improving customer retention.

Projects

- ID Card Reader: Developed a system to read and extract data from identity cards (ID cards), implementing OCR / smart-card reading functionality.
- Emotion Classification for Chatbots: Created a text-based emotion classifier using classical ML (Naïve Bayes & SVM), feature-extraction (CountVectorizer, TF-IDF), and evaluated on a six-emotion dataset with metrics like accuracy, F1-score, and AUC.
- Australian Airports TSP Optimisation: Solved a Travelling Salesperson Problem (TSP) variant over Australian airports using heuristic search (hill climbing) and genetic algorithms, optimizing for shortest total route.
- AQI Prediction (Decision Tree & Random Forest): Built a model to predict the Air Quality Index using decision tree and random forest regressors; performed data cleaning, feature engineering, and evaluated performance using regression metrics.

Education

Master of Artificial Intelligence

February 2025 - March 2027

University of Technology Sydney

Relevant Coursework: Computer Vision, Natural Language Processing, AI, Machine Learning, Deep Learning, Reinforcement Learning, Data Analysis, Data Visualisation

WAM: 87.25

Bachelor of Information Technology

August 2019 - August 2023

Universitas Surabaya, Indonesia

- Relevant Coursework: Computer Vision, Natural Language Processing, UI/UX, Human Computer Interaction, Mobile Programming, Web Programming, DSA

Extra Curricular Activities

President

August 2025 - Present

UTS Project Society, Sydney

- Lead a new 100+ member society focused on project-based learning and professional development.
- Oversee Discord server of 100+ members and creating Instagram content with 405+ Instagram views.
- Collaborate with 10+ startups as sponsors to provide members knowledge about industry.

Social Worker

August 2019 - December 2024

Tzu Chi Foundation

- Facilitated direct delivery of vital aid supplies, revamping access to essential resources for underprivileged communities.
- Provided compassionate and efficient distribution of food, medical supplies, and financial assistance, directly enhancing recipient experience and stability for 100+ people.
